

**SPECIFICATION AMENDMENTS**

Please replace paragraph [062] with the following:

[062] in the event of an alarm, several events may occur. The system 10 is connectable to an external monitoring station 40 which receives information transmitted from the system. For example, an [[An]] audible alarm can be immediately generated, and a message sent via cellular link (not shown) forming part of the system 10, to a central monitoring station (not shown). The message can contain details of the precise entry point, and also of the fact that the owner of the property is currently in the main bedroom of the property 12. The Police can be immediately notified by a secure computer link.

Please replace paragraph [064] with the following:

[064] Referring briefly to figure 2, the system 10 may be provided with video/audio devices 32 suitably located within the property 12, which devices 32, would, upon detection of an unauthorized individual, begin an audio/video recording of the intruder, tracking their movements throughout the property 12. Also shown in figure 2 are one or more signal generators 34 in operative association with processor 14 such that a signal can be provided to any authorized individual on the premises, detailing the location and/or number of unauthorized individuals in the premises.
